DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7, 11, 35, 36, 42, 43 are rejected under 35 U.S.C. 102(e) as being anticipated by PG-PUB 2005/0157683.

Re Claim 7, 11, 35, 36, 42, 43, fig. 11 teaches a beam forming antenna array 40 (antenna array; a transmitter array; a plurality of beam formers) wherein 40 receives replicated signals (a same data signal) from the STTC 10 (a plurality of channel encoders) to be transmitted in the respective paths of the beams (a plurality of directional transmission beams) wherein each signals are encoded with different coding by the STTC [0049, 0059, 0088].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 9, 10, 12, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over PG-PUB 2005/0157683.
5. Re Claim 8, '683 fails to explicitly teach, the claimed, "channel encoders code". However, one skilled in the art would have been motivated to code the data signal with such cross correlation to reduce interference.
6. Re Claim 9, 10, 12, 13, refer to Claim 8, wherein the one skilled would have been motivated to use error protective codes for reliability.

Allowable Subject Matter

7. The indicated allowability of claims 7-13 is withdrawn in view of the newly discovered reference(s) to PG-PUB 2005/0157683. Rejections based on the newly cited reference(s) above.
8. Claims 1-5, 33, 34, 40, and 41 are allowed.

Claim Objections

9. Claims 14-32, 37-39, 44, 45 are objected to because of the following informalities: Claims 14-32, 37-39, 44, 45 must be cancelled as non-elected claims. Appropriate correction is required.
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Firman Backer can be reached on 571-272-6703. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
